Verbal Description

One intact with horn & candelero (1.72 cm diameter, 3.72 cm deep) and a partial hole. The intact hole looks like it was made as a free-standing, triangular item, with at least 1 other chamber subsequently attached. Base and top flat, edges slightly rounded. Vent hole circular, 0.48 cm. Exterior decorated with irregular incised squares; lines maximally 0.40 cm wide x 0.11 cm deep, U-shaped. Chambers burnt, exterior also grayed. Possible tan exterior slip. Wall straight, slightly out-sloped. I think this started out as a triangular, single-hole candelero, then got complicated.
